Introduction

ERPNext Indonesia Localization is a custom application that helps businesses comply with Indonesian tax regulations through ERPNext.

It builds on top of ERPNext and the Frappe Framework. Go check these out!

Key Features

- Coretax XML Exporter
- Coretax Importer

Installation

Frappe Cloud

Don`t have a frappe site? New to ERPNext? Not an expert with cloud management? We've got you covered.

- Simply signup with Frappe Cloud for a free trial and create a new site.
- Select Frappe Version- 14 or 15 and select Erpnext Indonesia Localization from Apps to Install.

You can get started in a few minutes with a new site and a fresh install to try out the simple and cool features of the App.

Need consultation/support in getting started. Get help!

Docker

Use [this guide](#) to deploy ERPNext Indonesia Localization by building your custom image.

Sample Apps JSON

```shell
export APPS_JSON='[  {    "url": "https://github.com/frappe/erpnext",
"branch": "version-15"  }, {    "url": "https://github.com/agile-
technica/erpnext-indonesia-localization",    "branch":
"master"  }]'export APPS_JSON_BASE64=$(echo ${APPS_JSON} | base64 -w 0)
```

Manual

Once you've [set up a Frappe site](#), installing ERPNext Indonesia Localization is simple: Download the App using the Bench CLI

```sh
bench get-app https://github.com/agile-technica/erpnext-indonesia-
localization.git
```

Install the App on your site

```sh
bench --site [site name] install-app erpnext_indonesia_localization
```
